EXPERIENCE

edX / Remote — *Teaching Assistant (Frontend Web Development Training)*

Oct 2022 - Current

- Mentoring 200+ students in learning the fundamentals of web development, from the basics of "hello world" to deploying React applications.
- Breaking down concepts, and effectively communicating them across a broad range of topics such as HTML, CSS, Bootstrap, JavaScript, jQuery, ES6, Node.js, OOP, and React.
- Assisting students with technical issues encountered while setting up, coding, and deploying their projects.
- Reviewing student code and providing feedback to ensure best practices for writing efficient and performant JavaScript code.

Freelance / Remote — *Frontend Developer*

Sept 2021 - Current

- Rewritten HTML to meet industry standards for SEO and Accessibility (WCAG Compliant).
- Utilized HTML, CSS, and JavaScript to create responsive landing pages for both companies and clients.
- Communicate with clients to design and implement ideas that meet client standards.
- Design, develop, and code web pages for clients, which includes debugging issues, diagnosing root causes, and identifying solutions.

Uhaul / Gainesville, FL — *Customer Service Representative*

July 2019 - August 2021

Sail Trailers / Columbus, GA — *Office Manager*

March 2016 - July 2019

- Consolidated spreadsheets and reporting, increasing efficiency and saving the company \$18K in annual labor costs in 2018.
- Overhauled filing systems by upgrading to digital systems, saving 20+ monthly hours in repetitive manual input.

EDUCATION

Altcademy — Frontend Development Certification

Sept 2021 - July 2022

Received certifications for:

- HTML CSS Development
- JavaScript Programming
- Dynamic Website Development

Projects

TaskFire - <https://taskfire.jamesellerbee.com/>

February 2024

- TaskFire is a task list app for creating and managing tasks. It features user accounts with server-side storage for tasks. The frontend was created using Next.js.

Lyric-Cloud

January 2024

- Using the top tracks from a user's Spotify account, this application creates a word cloud based on the lyrics from those top tracks. Made with Next.js and uses an NLP library to process the lyrics.

Sail Trailers - <https://sailtrailers.com/>

July 2023

- Working closely with a company to build a responsive and WCAG compliant site to replace the old company site.

Movie Search Tool

May 2022

- Created with HTML, Bootstrap, and JavaScript, this search tool uses the OMBD API to find movies. It also has a random word search.

Spotify Remote Player

July 2022

- Utilized React.JS and the Spotify Web API to create a remote player for Spotify that can browse the user's playlists, and has basic music controls.
